SKILLS SUMMARY

- | | | |
|--------------------|---|--|
| • Languages | : | Java, Python, C |
| • Frameworks | : | Flask |
| • Databases | : | MySQL |
| • Machine Learning | : | CNNs, Transfer Learning, PyTorch, TensorFlow |
| • Web Technologies | : | HTML, CSS, JavaScript |
| • Tools | : | Git, Linux |
| • Core CS | : | Data Structures, Algorithms, OOP |

EDUCATION

Anurag University	Hyderabad, India
Bachelor of Technology – Computer Science and Engineering; CGPA: 8.20	2022-2026

Telangana State Residential College	Khammam, India
Intermediate; Percentage: 95.0%	2020-2022

Telangana State Residential School	Khammam, India
Intermediate; GPA: 10/10	2019-2020

EXPERIENCE

Indian Skill Pharma Tech Consulting (ISPTC)

Web Development Project Associate

- Developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript for real-world web development projects.
- Designed modern UI components and improved website layouts to enhance user experience and cross-device compatibility.
- Implemented interactive frontend functionalities using JavaScript to improve website responsiveness and usability.
- Worked on webpage styling, structure optimization, and frontend performance improvements for better visual consistency.
- Collaborated with team members to develop and deliver project features within deadlines while following clean frontend development practices.

PROJECTS

1. Fire Accident Detection System | Python, OpenCV, TensorFlow, SQLite, SMTP | [GitHub](#)

- Developed a real-time fire and smoke detection system using Python, OpenCV, and TensorFlow to monitor live video streams and identify fire hazards with high detection accuracy.
- Built and trained a CNN-based detection pipeline with image preprocessing techniques to reduce false positives and improve real-time responsiveness.
- Integrated an automated SMTP alert system to instantly notify users during fire incidents, enabling faster emergency response.
- Designed a scalable backend using SQLite to store detection logs, timestamps, and alert history for monitoring and analysis.
- Optimized the system for continuous surveillance and low-latency processing, making it suitable for smart safety and industrial monitoring applications.

2. Travel Website | React.js, Tailwind CSS, Node.js, Express.js, MongoDB | [GitHub](#)

- Developed a scalable full-stack Travel Booking Platform using React.js, Tailwind CSS, Node.js, Express.js, and MongoDB with a modern responsive UI.
- Implemented secure JWT authentication, RESTful APIs, and booking management workflows to handle user interactions efficiently.
- Built dynamic search, filtering, and travel package management features to improve user engagement and overall usability.
- Optimized application performance with reusable component architecture, efficient database operations, and responsive cross-device compatibility.
- Applied clean coding standards and modular system design to create a production-ready application with strong scalability and maintainability.

CERTIFICATIONS

- NPTEL – Programming in Java
- Salesforce – Agent force Specialist
- Oracle – Certified Data Science Professional
- Oracle – Certified AI Professional
- Microsoft – Fundamentals of Security, Compliance, and Identity
